

*Quality Software Development
for Business Success*

Enterprise Software Development and Quality Solutions

Enterprise software development requires an optimised and automated Development and Quality Control Platform that fits with the particular environment of each company. A set of methodologies and tools is essential to be able to reach a higher level of productivity. The Server Labs offers expertise and support for implementing these methodologies and tools.

Benefits

Formalised development process through entire software lifecycle. The definition of a set of development processes that relies on a robust underlying platform responsible to optimise the whole lifecycle as well as overall quality, controlling and automating applications being released, minimising error prone conditions.

Mapping software development to business objectives. Seamlessly grow capacity with peaks in demand and release when no longer needed. Eliminate over or under provisioning.

High level of automated testing. The introduction of comprehensive controlled testing with measurable and repeatable test criteria using latest advances in automation techniques. This permits to have effective testing at all levels, from unit testing to performance and acceptance testing, in order to assure that Business applications perform as expected. Continuous automated testing through entire lifecycle of system to support upgrades and bug fixes.

Objective software quality metrics. The clear definition of objective metrics permits organisations to measure and compare project quality.

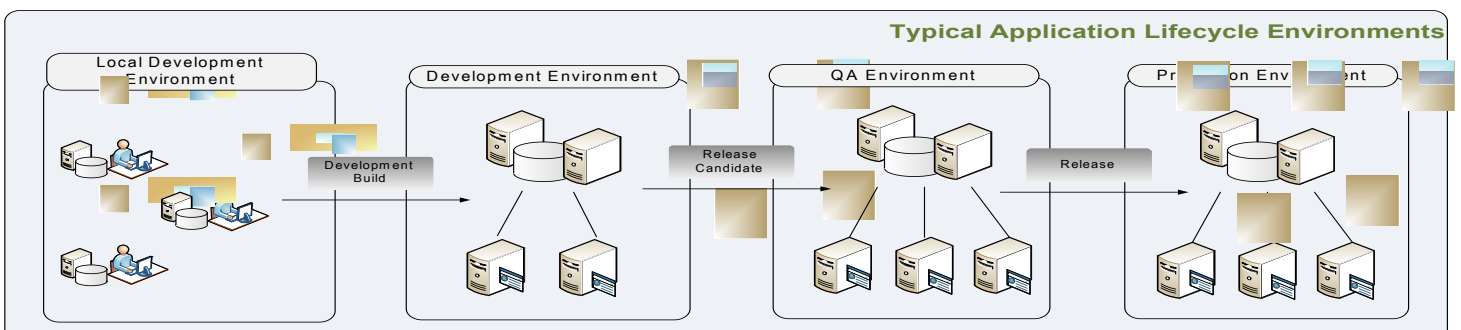

Efficient integration with process for outsourced software development. Controlling externalised projects with a platform increases quality and raises confidence.

Highly flexible software release process to respond to changing business needs. Respond quickly to new business requirements.

Integration with existing development methodologies. Enable a more effective execution of projects under a traditional waterfall methodology while enabling seamless transition to more agile development methodologies.

Benefits for your business

- Formalised development process through entire software lifecycle.
- Mapping software development to business objectives.
- High level of automated testing.
- Objective software quality metrics.
- Efficient integration with process for outsourced software development.
- Highly flexible software release process to respond to changing business needs.
- Integration with existing development methodologies.

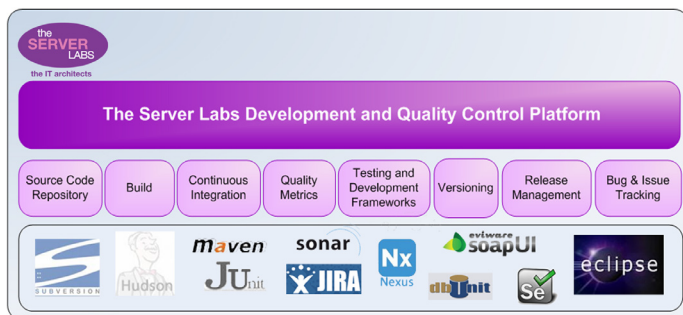

The Server Labs Development and Quality Control Platform

We have created a powerful development and quality control platform to address all of today's enterprise development needs. The solution combines the best-of-breed tools and frameworks together with a set of methodologies and best practices. Features include:

- Continuous Integration
- Test Driven Development
- Quality Metrics and enforcement
- Formal Versioning at all levels
- Automated Build pipeline
- Release Management
- Hands-on Training
- Documentation

The Server Labs Development and Quality Services

- **Development Strategy**
 - Development process review
 - Solution design and technology selection
 - Methodology and Framework implementation
- **Quality Assurance**
 - QA Methodologies consultancy
 - Test Process Improvement
 - Expert QA/Test Analysts
 - Mentoring Services
 - Testing Training Services
- **Software Development**
 - Agile Methodologies
 - Java, JEE, .NET, Spring, Hibernate, JSF, Ajax, Seam, Dynamic Languages
- **Training and Master Classes**
 - Agile Methodologies
 - Software Testing Practices and Tools
 - Quality Assurance frameworks and methodologies
 - Security Architectures for SOA and Applications

The Server Labs

The Server Labs (TSL) is a specialist IT consultancy and development company and a leading authority in Cloud Computing services. Founded in 2004, The Server Labs focuses on the design and implementation of IT architectures and advanced software engineering projects, working with the most advanced solutions and technologies and offering its clients cost-effective, scalable and high performance solutions.

TSL's customer groups are predominantly large and medium-sized corporations which share a growing need for cost effective and scalable IT solutions. TSL has offices in Spain, Germany and the UK. Most recently TSL started partnering with Amazon and RightScale to facilitate the adoption of Cloud Computing in Europe.

For more information about The Server Labs and the services we can offer you please visit our website www.theserverlabs.com

If you would like to talk to us directly please contact us at our offices in the United Kingdom, Spain or Germany.
